

Features

- CE certified
- The special electronic circuitry design allows water refill to be so controlled that boiling water can be drawn off continuously without any drop in water temperature. In other words, water always remains boiling
- Dry boil protection design
- A mesh filter is included at the water inlet to protect the solenoid valve from particle clogging and water contamination
- Drain valve is easily reachable from the front for easy water draining
- The unit is thermally insulated, avoiding heat dissipation or human scalding
- Durable "No Drip" faucet.
- High grade stainless steel: SUS 304 for food contact safety

Model: WE10

Dimensions: 282 x 530 x 600 mm

Power: 220 V, 50 Hz, 2.5 kW

Capacity : 10 L

Accessories:

- Drip pan
- Water inlet hose
